

# Alvin D'souza

Front - End Developer

## About Me

---

I am passionate about applying new age technology to solving real life problems, with an analytical approach and creative mind, always working on building my skills to perform better and make a difference.

## Education

---

2022 - 2026

### Fr. Conceicao Rodrigues College of Engineering

Currently Pursing Bachelor in Technology Computer Engineering at Mumbai's premier institute.

## Projects

---

### Credence

An E-commerce platform where each product is securely delivered from the manufacturing to the user with Blockchain

### College QR System

A QR app hosted on the college servers to provide a glimpse of various features in our college labs

### Medinova

An EHR system for a medical institution with disease prediction, high end face recognition security and real time appointment scheduling

### CertSecure

A blockchain infused Certificate Creation and Verification website, with it's own Creative certificate builder

### Legally Yours

We bridge the gap between intricate legal docs & everyday understanding using NLP to simplify complex legal content

## Achievements
